

G4702 & G4705 INSTALLATION INSTRUCTIONS

The G4702 & G4705 Air Cleaners can be mounted on the floor, wall or a ceiling; whichever place is convenient.

If mounting on a wall or ceiling, we recommend attaching the air cleaner to the wall or ceiling studs using sheetrock screws. This will require at least four holes be drilled corresponding to the stud spacing. An alternate method would be to use wall anchors. Whichever method you use, make sure the air cleaner is mounted in a sturdy fashion to prevent it from pulling loose.
