This manual provides critical safety instructions on the proper setup, operation, maintenance, and service of this machine/tool. Save this document, refer to it often, and use it to instruct other operators.

Failure to read, understand and follow the instructions in this manual may result in fire or serious personal injury—including amputation, electrocution, or death.

The owner of this machine/tool is solely responsible for its safe use. This responsibility includes but is not limited to proper installation in a safe environment, personnel training and usage authorization, proper inspection and maintenance, manual availability and comprehension, application of safety devices, cutting/sanding/grinding tool integrity, and the usage of personal protective equipment.

The manufacturer will not be held liable for injury or property damage from negligence, improper training, machine modifications or misuse.

Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:

- Lead from lead-based paints.
- Crystalline silica from bricks, cement and other masonry products.
- Arsenic and chromium from chemically-treated lumber.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: Work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.

INTRODUCTION

Foreword

We are proud to offer the Model H8170/H8171 Hydraulic/Electric Log Splitter. This machine is part of a growing Grizzly family of fine household equipment. When used according to the guidelines set forth in this manual, you can expect years of trouble-free, enjoyable operation and proof of Grizzly’s commitment to customer satisfaction.

The specifications, drawings, and photographs illustrated in this manual represent the Model H8170/H8171 when the manual was prepared. However, owing to Grizzly’s policy of continuous improvement, changes may be made at any time with no obligation on the part of Grizzly.

For your convenience, we always keep current Grizzly manuals available on our website at www.grizzly.com. Any updates to your machine will be reflected in these manuals as soon as they are complete. Visit our site often to check for the latest updates to this manual!

Contact Info

If you have any comments regarding this manual, please write to us at the address below:

MODEL H8170/H8171 HYDRAULIC/ELECTRIC LOG SPLITTER

Motor:
Type ............................................................................ TEFC Capacitor Start Induction
Horsepower ................................................................................................. 1-3/4 HP
Voltage .......................................................................................................... 110V
Cycle ........................................................................................................... 60Hz
Amps .......................................................................................................... 13 A

Dimensions (Length) x Width x Height):
H8170 ................................................................................................37 x 10¼ x 19 in.
H8171 .............................................................................................. 47¼ x 10¼ x 19 in.

Net Weight:
H8170 ..................................................................................................................99 lbs.
H8171 ............................................................................................................... 110 lbs.

Hydraulic Oil Capacity:
H8170 ................................................................................................................1.7 Qts.
H8171 ................................................................................................................ 2.5 Qts.
Machines ship filled with oil................................................................................. Yes

Hydraulic Oil Type:
................................................................. SHELL Tellus 22
................................................................. MOBIL DTE 11
................................................................. ARAL Vitam GF 22
................................................................. BP Energol HLP-HM 22

Splitting Force: .............................................................................. 10,000 lbs.

Maximum Log Length:
H8170 .................................................................................................................14½ in.
H8171 .............................................................................................................. 20½ in.

Log Splitting Diameter (Appx.): ....................................................................2−10 in.
(The actual maximum and minimum splitting diameter for a particular log will depend on wood species, grain characteristics and moisture content.)

SECTION 1: SAFETY

For Your Own Safety, Read Instruction Manual Before Operating This Machine

The purpose of safety symbols is to attract your attention to possible hazardous conditions. This manual uses a series of symbols and signal words intended to convey the level of importance of the safety messages. The progression of symbols is described below. Remember that safety messages by themselves do not eliminate danger and are not a substitute for proper accident prevention measures. Always use common sense and good judgment.

⚠️ DANGER Indicates an imminently hazardous situation which, if not avoided, WILL result in death or serious injury.

⚠️ WARNING Indicates a potentially hazardous situation which, if not avoided, COULD result in death or serious injury.

⚠️ CAUTION Indicates a potentially hazardous situation which, if not avoided, MAY result in minor or moderate injury. It may also be used to alert against unsafe practices.

NOTICE This symbol is used to alert the user to useful information about proper operation of the machine.

Safety Instructions for Machinery

⚠️ WARNING

OWNER’S MANUAL. Read and understand this owner’s manual BEFORE using machine.

TRAINED OPERATORS ONLY. Untrained operators have a higher risk of being hurt or killed. Only allow trained/supervised people to use this machine. When machine is not being used, disconnect power, remove switch keys, or lock-out machine to prevent unauthorized use—especially around children. Make workshop kid proof!

DANGEROUS ENVIRONMENTS. Do not use machinery in areas that are wet, cluttered, or have poor lighting. Operating machinery in these areas greatly increases the risk of accidents and injury.

MENTAL ALERTNESS REQUIRED. Full mental alertness is required for safe operation of machinery. Never operate under the influence of drugs or alcohol, when tired, or when distracted.

ELECTRICAL EQUIPMENT INJURY RISKS. You can be shocked, burned, or killed by touching live electrical components or improperly grounded machinery. To reduce this risk, only allow qualified service personnel to do electrical installation or repair work, and always disconnect power before accessing or exposing electrical equipment.

DISCONNECT POWER FIRST. Always disconnect machine from power supply BEFORE making adjustments, changing tooling, or servicing machine. This prevents an injury risk from unintended startup or contact with live electrical components.

EYE PROTECTION. Always wear ANSI-approved safety glasses or a face shield when operating or observing machinery to reduce the risk of eye injury or blindness from flying particles. Everyday eyeglasses are not approved safety glasses.
WARNING

WEARING PROPER APPAREL. Do not wear clothing, apparel or jewelry that can become entangled in moving parts. Always tie back or cover long hair. Wear non-slip footwear to avoid accidental slips, which could cause loss of workpiece control.

HAZARDOUS DUST. Dust created while using machinery may cause cancer, birth defects, or long-term respiratory damage. Be aware of dust hazards associated with each workpiece material, and always wear a NIOSH-approved respirator to reduce your risk.

HEARING PROTECTION. Always wear hearing protection when operating or observing loud machinery. Extended exposure to this noise without hearing protection can cause permanent hearing loss.

REMOVE ADJUSTING TOOLS. Tools left on machinery can become dangerous projectiles upon startup. Never leave chuck keys, wrenches, or any other tools on machine. Always verify removal before starting!

INTENDED USAGE. Only use machine for its intended purpose and never make modifications not approved by Grizzly. Modifying machine or using it differently than intended may result in malfunction or mechanical failure that can lead to serious personal injury or death!

AWKWARD POSITIONS. Keep proper footing and balance at all times when operating machine. Do not overreach! Avoid awkward hand positions that make workpiece control difficult or increase the risk of accidental injury.

CHILDREN & BYSTANDERS. Keep children and bystanders at a safe distance from the work area. Stop using machine if they become a distraction.

GUARDS & COVERS. Guards and covers reduce accidental contact with moving parts or flying debris. Make sure they are properly installed, undamaged, and working correctly.

FORCING MACHINERY. Do not force machine. It will do the job safer and better at the rate for which it was designed.

NEVER STAND ON MACHINE. Serious injury may occur if machine is tipped or if the cutting tool is unintentionally contacted.

STABLE MACHINE. Unexpected movement during operation greatly increases risk of injury or loss of control. Before starting, verify machine is stable and mobile base (if used) is locked.

USE RECOMMENDED ACCESSORIES. Consult this owner’s manual or the manufacturer for recommended accessories. Using improper accessories will increase the risk of serious injury.

UNATTENDED OPERATION. To reduce the risk of accidental injury, turn machine OFF and ensure all moving parts completely stop before walking away. Never leave machine running while unattended.

MAINTAIN WITH CARE. Follow all maintenance instructions and lubrication schedules to keep machine in good working condition. A machine that is improperly maintained could malfunction, leading to serious personal injury or death.

CHECK DAMAGED PARTS. Regularly inspect machine for any condition that may affect safe operation. Immediately repair or replace damaged or mis-adjusted parts before operating machine.

MAINTAIN POWER CORDS. When disconnecting cord-connected machines from power, grab and pull the plug—NOT the cord. Pulling the cord may damage the wires inside. Do not handle cord/plug with wet hands. Avoid cord damage by keeping it away from heated surfaces, high traffic areas, harsh chemicals, and wet/damp locations.

EXPERIENCING DIFFICULTIES. If at any time you experience difficulties performing the intended operation, stop using the machine! Contact our Technical Support at (570) 546-9663.
**WARNING**

Additional Safety Instructions for Hydraulic Log Splitters

DO NOT ATTEMPT TO CHANGE THE MAXIMUM PRESSURE SETTING ON THIS LOG SPLITTER. Adjusting the pressure limit screw may cause a hydraulic explosion and seriously injure the operator and bystanders.

BE FAMILIAR WITH THE HAZARDS OF HYDRAULIC INJECTION INJURIES. Leaking hydraulic fluid may be under sufficient pressure to penetrate skin. Hydraulic fluid injected into skin is a medical emergency and may, if not treated promptly, result in infection, disability, or death.

NEVER USE HANDS TO CHECK FOR HYDRAULIC LEAKS. Always wear gloves when operating hydraulic equipment.

PROTECT EYES WHEN WORKING AROUND HYDRAULIC EQUIPMENT. Safety glasses may not be sufficient to protect your eyes from hot pressurized fluid. Stay away from leaks until the system is depressurized.

STOP THE MACHINE IMMEDIATELY IF IT LEAKS HYDRAULIC FLUID. Allowing the machine to run with a leak significantly increases the risk of injury.

NEVER FORCE HYDRAULIC EQUIPMENT TO APPLY MORE PRESSURE THAN IT IS DESIGNED TO EXERT. Pushing hydraulic equipment beyond the limitations of design can easily damage hydraulic systems and increase the risk of operator injury.

REGULARLY CHECK THE HYDRAULIC FLUID LEVEL AND ADD FLUID WHEN NEEDED.

NEVER USE THE LOG SPLITTER FOR ANY PURPOSE OTHER THAN SPLITTING WOOD.

NEVER ALLOW OTHERS TO ASSIST THE OPERATOR IN LOADING OR SPLITTING LOGS.

KEEP CHILDREN AWAY FROM THE LOG SPLITTER AT ALL TIMES! IT IS NOT A TOY.

NEVER LEAVE THE SPLITTER UNATTENDED AND ALWAYS STORE IT IN A LOCKED LOCATION WHEN IT IS NOT IN USE.

FOLLOW THE INSTRUCTIONS IN THIS MANUAL TO RELEASE LOGS THAT BECOME JAMMED ON THE SPLITTING HEAD. Be aware that logs with high moisture content will be more difficult to split and more likely to jam.

BE AWARE THAT LOGS WITH EXTENSIVE KNOTTING MAY BE DIFFICULT OR IMPOSSIBLE TO SPLIT. Making repeated attempts to split an unsuitable log will increase wear on the splitter and increase the risk of operator injury.

NEVER ATTEMPT TO SPLIT MORE THAN ONE LOG AT A TIME. Doing so may cause logs to fly off the splitter with great force, resulting in serious injury or death.

NEVER USE ANY PART OF YOUR BODY TO GUIDE OR STEADY A LOG WHEN THE RAM IS MOVING. Failure to follow this instruction can result in serious personal injury, including loss of limbs.
110V Operation

**WARNING**
Serious personal injury could occur if you connect the machine to the power source before you have completed the set up process. DO NOT connect the machine to the power source until instructed to do so.

**Amperage Draw**
The Model H8170/H8171 motor draws the following amps under maximum load:

Motor Draw............................................ 13 Amps

**Circuit Recommendations**
We recommend connecting your machine to a dedicated and grounded circuit that is rated for the amperage given below. Never replace a circuit breaker on an existing circuit with one of higher amperage without consulting a qualified electrician to ensure compliance with wiring codes. If you are unsure about the wiring codes in your area or you plan to connect your machine to a shared circuit, consult a qualified electrician.

110V Circuit........................................... 20 Amps

**Plug/Receptacle Type**
Included Plug Type............................... NEMA 5-15

---

**WARNING**
Electrocution or fire could result if this machine is not grounded correctly or if your electrical configuration does not comply with local and state codes. Ensure compliance by checking with a qualified electrician!

---

**CAUTION**
Two-prong outlets do not meet the grounding requirements for this machine. Do not modify or use an adapter on the plug provided—if it will not fit the outlet, have a qualified electrician install the proper outlet with a verified ground.

---

**Extension Cords**
Follow these instructions when using an extension cord with your log splitter:

- Use at least a 12 gauge cord that does not exceed 50 feet in length!
- The cord must have a ground wire and plug pin; always keep the cord and plug dry.
- A qualified electrician MUST size cords over 50 feet long to prevent motor damage.

---

Figure 3. Typical type 5-15 plug and receptacle.
SECTION 3: SETUP

SetUp Safety

![WARNING]

This machine presents serious injury hazards to untrained users. Read through this entire manual to become familiar with the controls and operations before starting the machine!

![WARNING]

Wear safety glasses during the entire setup process!

![WARNING]

Wear gloves during the entire setup process and during operations!

![WARNING]

This log splitter is heavy. Get help whenever moving the log splitter between worksites and lifting it to an elevated work surface.

Items Needed for Setup

The following items are needed to complete the setup process, but are not included with your machine:

<table>
<thead>
<tr>
<th>Description</th>
<th>Qty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lifting Assistance</td>
<td>As needed</td>
</tr>
<tr>
<td>Wrench 14mm</td>
<td>1</td>
</tr>
<tr>
<td>Safety Glasses</td>
<td>1 pr. for each person</td>
</tr>
<tr>
<td>Gloves</td>
<td>1 pr. for each person</td>
</tr>
</tbody>
</table>

Unpacking

Your machine was carefully packaged for safe transportation. Remove the packaging materials from around your machine and inspect it. If you discover the machine is damaged, please immediately call Customer Service at (570) 546-9663 for advice.

Save the containers and all packing materials for possible inspection by the carrier or its agent. Otherwise, filing a freight claim can be difficult.

When you are completely satisfied with the condition of your shipment, inventory the contents.
Inventory

After all the parts have been removed from the shipping box you should have the following items:

**Box Contents (Figure 4):**

<table>
<thead>
<tr>
<th>A. Log Splitter Body</th>
<th>Qty</th>
</tr>
</thead>
<tbody>
<tr>
<td>B. Support Leg</td>
<td>1</td>
</tr>
<tr>
<td>C. Hardware Bag (Not Shown)</td>
<td></td>
</tr>
<tr>
<td>— Carriage Bolts M8-1.25 x 10</td>
<td>5</td>
</tr>
<tr>
<td>— Hex Nuts M8-1.25</td>
<td>5</td>
</tr>
</tbody>
</table>

If any nonproprietary parts are missing (e.g. a nut or a washer), we will gladly replace them; or for the sake of expediency, replacements can be obtained at your local hardware store.

**NOTICE**

Some hardware/fasteners on the inventory list may arrive pre-installed. Check mounting locations before assuming that any items from the inventory list are missing.

Site Considerations

**Work Surface**

Always use the splitter on a flat, stable work surface. Operating your splitter will be easiest when the controls are waist high. At minimum, your work surface must safely support the combined weight of splitter and the heaviest log you intend to split.

**Working Clearances**

Allow enough room on all sides to move logs to and from the splitter. Refer to the Machine Data Sheet for the dimensions of your splitter.

**Moving the Splitter**

The wheels on the Model H8170/H8171 make it possible for one person to move it short distances. However, the rugged design of your splitter makes it heavy; we recommend that you get assistance whenever lifting it.

**To move the splitter:**

1. DISCONNECT THE LOG SPLITTER FROM THE POWER SUPPLY!

2. Close the air bleeder screw by turning it clockwise (viewed from the rear of the splitter) until it stops. This will prevent hydraulic fluid from leaking out during the move.

3. Grab the front handle and lift until the wheels carry the load of the rear end. You will need to raise the front end about 15” to shift the load to the wheels. Roll the splitter to the desired location and lower the front end.

4. Open the air bleeder screw by turning it counterclockwise two full turns.

**To lift the splitter:**

1. Do Steps 1–2, above.

2. Get an assistant to help you to lift the splitter and carry it to the new worksite; use the handles at each end.
Assembly

The only assembly required is attaching the support leg to the splitter assembly.

Components and Hardware Needed: Qty
Carriage Bolts M8-1.25 x 10.............................. 5
Hex Nut M8-1.25................................................ 5

To attach the support leg:

1. Carefully lay the splitter on its side, with the wiring box facing up.
2. Use the carriage bolts and nuts to secure the support leg to the splitter body as shown in Figure 5.

Test Run

Before you begin operations, do Steps 1–5 below to make sure your splitter is running properly.

To test run the log splitter:

1. Make sure that all tools and other materials are cleared away from the machine.
2. Review SECTIONS 1 and 2 (SAFETY and CIRCUIT REQUIREMENTS) on Pages 15-18 and connect your machine to the power source.
3. Turn the air bleed screw clockwise (as you face the rear of the splitter) until it stops, then turn it counterclockwise two full turns.
4. Press the ON button in and, while holding it down, push the hydraulic control lever down. The ram should move forward, stopping about 8⅞” from the splitting wedge.

Note: For your safety, both the ON button and the hydraulic lever must be engaged to start the ram moving forward.
5. When the ram stops moving forward, release both ON button and the control lever. The motor will stop running and the ram will slide back to the start position.

—If the ram moves as described in Steps 4–5, then the splitter is working properly and the test run is complete.

—If the ram does not operate as described, or if the splitter vibrates excessively or makes unusual noises, stop using the splitter immediately, disconnect the splitter from the power supply and refer to Troubleshooting on Page 17. If you still cannot resolve the problem, contact our Technical Support at (570) 546-9663.
SECTION 4: OPERATIONS

Operation Safety

⚠️ WARNING
Damage to your eyes, lungs, and ears could result from using this machine without proper protective gear. Always wear safety glasses, a respirator, and hearing protection when operating this machine.

⚠️ WARNING
Loose hair and clothing could get caught in machinery and cause serious personal injury. Keep loose clothing and long hair away from moving machinery.

⚠️ WARNING
Always wear gloves when operating this log splitter!

NOTICE
If you have never used this type of machine or equipment before, WE STRONGLY RECOMMEND that you read books, trade magazines, or get formal training before beginning any projects. Regardless of the content in this section, Grizzly Industrial will not be held liable for accidents caused by lack of training.

Overview

When you press the ON button, the electric motor pressurizes hydraulic fluid. When you push the control lever down, the pressurized fluid moves the pusher forward, pressing the log into the splitting wedge.

To operate the splitter you must use both hands to activate the controls simultaneously. See Figure 6 for the position of the controls and hands during operation.

Figure 6. Operating the basic controls.
Basic Operations

Locate the splitter as close as possible to the logs you will split. Refer to CIRCUIT REQUIREMENTS, on Page 8 for the maximum length of extension cords.

To split a log:

1. Make sure the bleeder screw is open by first turning it clockwise until it stops and then turning it counterclockwise two full turns.
2. Place the log squarely on the bed as shown in Figure 7. DO NOT try to split a log against the grain by laying it sideways on the bed.

![Figure 7. Placing a log on the splitter bed.](image)

3. With your body and clothing away from log and the hydraulic ram, depress and hold the ON button, then push the control lever down. Keep pressing the ON button while holding the control arm down; the ram will push the log into the splitting head. When the ram stops, immediately release both the ON button and control arm.

   Note: The hydraulic system will be damaged if you try to force the ram forward by holding the controls in the ON position after the ram stops.

4. Clear the pieces of split wood away from the splitter.

Removing a Jammed Log

If a log does not split and becomes jammed on the splitting wedge, DO NOT try to clear it by hitting it from the side or kicking it; this can result in personal injury and damage the splitter.

To safely remove a jammed log:

1. With the ram fully back, set a wooden wedge flat side down on the bed with the narrow end pointing under the log as shown in Figure 8.

![Figure 8. Using a wedge to clear a jam.](image)

   Note: A piece of split wood set crossways on the bed may make a good wedge, but it must narrow enough to slide under the end of the jammed log.

2. Start the splitter to push the wedge under the jammed log until the log lifts off the splitting head.

   Note: If the first wedge does not free the log, repeat the process using wedges with steeper slopes until the log is free.
SECTION 5: MAINTENANCE

WARNING
Always disconnect power to the machine before performing maintenance. Failure to do this may result in serious personal injury.

Cleaning

For optimum performance from your log splitter, clean it with a brush after every use and wipe it down occasionally with a rag. To prevent rusting, dry the log splitter thoroughly after every use.

Schedule

Follow the maintenance schedule below and refer to any specific instructions given in this section.

Before each use, check for:
• Low hydraulic fluid level.
• Loose hardware.
• Leaking hydraulic fluid.
• Any other unsafe or abnormal condition.

Every 150 hours of use:
• Replace old hydraulic fluid with new.

As needed:
• Remove rust from the splitting wedge and apply rust-preventative touch-up paint to bare surfaces.

Checking/Adding Hydraulic Fluid

The oil fill plug on the Model H8170/H8171 has a dipstick attached. The fill plug is located under the bleed screw on the back of the splitter.

To check the fluid level:

1. Use the front lifting handle to raise the splitter to a vertical position, motor end up. Make sure the ram is fully retracted and have an assistant hold the splitter steady.

2. Use an 8mm hex wrench to remove the fill plug/dipstick, as shown in Figure 9.

3. Wipe off the dipstick and use it to check the oil level as shown in Figure 10.
—If the oil level is at least halfway between the two grooves, no additional oil is needed—wipe the dipstick clean, return the plug, and tighten it.

—If the oil level is close to the lower mark, add fluid through the oil plug hole until the level is at the top line, then tighten the fill plug.

### Changing the Hydraulic Fluid

Change the hydraulic fluid after each 150 hours of operation. See the Machine Data Sheet for fluid requirements and capacities of your model. Failure to follow these instructions may damage your machine and cause serious personal injury.

| ![Gloves] | **WARNING**
| Always wear protective gloves when changing hydraulic fluid. |

| ![Goggles] | **WARNING**
| Always wear safety goggles when changing hydraulic fluid. |

#### To change the hydraulic fluid:

1. **DISCONNECT THE SPLITTER FROM THE POWER SOURCE!**

2. With the help of an assistant, tip the splitter back, motor end down, and place a basin under the fill plug to catch the oil as shown in [Figure 11](#).

![Figure 11. Draining hydraulic fluid.](#)

3. Remove the oil fill plug. As the fluid drains into the basin, loosen the bleeder screw two full turns.

4. While holding a clean rag over the fill opening, tip the splitter upright, motor end up. Have your assistant hold it steady.

5. Pour new oil into the fill plug hole. Check the fluid level frequently as you add oil. Fill to until the oil level is between the two grooves on the dipstick, then replace the fill plug and tighten.

**Note:** Remember to fully tighten the fill plug before removing it to check the fluid level. If you do not, you run the risk of over-filling, which can result in machine damage.
Sharpening the Splitting Wedge

During the life of your log splitter, you will need to sharpen the splitting wedge periodically. When sharpening the wedge, keep in mind that if you try and keep the wedge sharpened to a razor point (like an axe blade), you will greatly reduce the life of the wedge by always sharpening it. However, if you allow the point to become very dull or bullnosed, your log splitter will have to overwork to split logs and wear out. The optimum point is somewhere between. Refer to Figure 12 for a general idea.

**WARNING**
Always wear protective, gloves when sharpening the splitting wedge.

Figure 12. Wedge points.
**SECTION 6: SERVICE**

Review the troubleshooting and procedures in this section to fix or adjust your machine if a problem develops. If you need replacement parts or you are unsure of your repair skills, then feel free to call our Technical Support at (570) 546-9663.

**Troubleshooting**

**Operation**

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Machine does not start or a breaker trips.</td>
<td>1. Plug/receptacle is at fault or wired incorrectly. 2. Power supply is at fault/switched OFF. 3. Motor ON/OFF switch is at fault. 4. Wiring is open/has high resistance. 5. Start capacitor faulty. 6. Motor is at fault.</td>
<td>1. Test for good contacts; correct the wiring. 2. Ensure hot lines have correct voltage on all legs and main power supply is switched ON. 3. Replace faulty ON/OFF switch. 4. Check for broken wires or disconnected/corroded connections, and repair/replace as necessary. 5. Test/repair/replace. 6. Test/repair/replace.</td>
</tr>
<tr>
<td>Machine stalls or is underpowered.</td>
<td>1. Plug/receptacle is at fault. 2. Excessively long extension cord. 3. Motor bearings are at fault. 4. Machine is undersized for the task. 5. Motor has overheated. 6. Motor is at fault.</td>
<td>1. Test for good contacts; correct the wiring. 2. Move splitter closer to the power supply. 3. Test by rotating shaft; rotational grinding/loose shaft requires bearing replacement. 4. Stop operation. 5. Clean off motor, let cool, and reduce workload. 6. Test/repair/replace.</td>
</tr>
<tr>
<td>Machine has vibration or noisy operation.</td>
<td>1. Motor or component is loose. 2. Motor fan is rubbing on fan cover. 3. Dirt in motor fan enclosure</td>
<td>1. Inspect/replace stripped or damaged bolts/nuts, and re-tighten with thread locking fluid. 2. Replace dented fan cover; replace loose/damaged fan. 3. Clean, reassemble.</td>
</tr>
<tr>
<td>Electric motor operating properly but the hydraulic ram won’t split logs.</td>
<td>1. Bleeder screw closed. 2. Hydraulic fluid low. 3. Hydraulic system damaged or fluid is leaking out.</td>
<td>1. Open screw two full turns. 2. Check fluid level, add fluid. 3. Repair/replace damaged parts.</td>
</tr>
<tr>
<td>Ram works, but logs are hard to split.</td>
<td>1. Log unsuitable: twisted grain, high moisture content, heavily knotted. 2. Splitting wedge is dull. 3. Splitting wedge is damaged.</td>
<td>1. Don’t attempt to split unsuitable logs. 2. Sharpen wedge. 3. Stop operations/repair wedge.</td>
</tr>
<tr>
<td>Ram does not retract properly.</td>
<td>1. Debris lodged in the ram return path or in the return springs. 2. Damaged seals in hydraulic system.</td>
<td>1. Clear debris. 2. Repair/replace damaged parts.</td>
</tr>

**WARNING!**
SHOCK HAZARD! Disconnect power before working on wiring.

View this page in color at www.grizzly.com.
Before servicing the hydraulic system always disconnect the motor from power, and depressurize the hydraulic system by moving the control lever back and forth a few times. Ignoring this warning can lead to hydraulic fluid poisoning, which is a serious and potentially fatal injury.

This hydraulic schematic will help you identify hydraulic system components. However, it is not intended to be a how-to repair guide. Seek assistance from a professional hydraulic technician whenever servicing or repairing the hydraulic system.

### WARNING

Safety labels warn about machine hazards and ways to prevent injury. The owner of this machine MUST maintain the original location and readability of the labels on the machine. If any label is removed or becomes unreadable, REPLACE that label before using the machine again. Contact Grizzly at (800) 523-4777 or www.grizzly.com to order new labels.
WARRANTY AND RETURNS

Grizzly Industrial, Inc. warrants every product it sells for a period of 1 year to the original purchaser from the date of purchase. This warranty does not apply to defects due directly or indirectly to misuse, abuse, negligence, accidents, repairs or alterations or lack of maintenance. This is Grizzly's sole written warranty and any and all warranties that may be implied by law, including any merchantability or fitness, for any particular purpose, are hereby limited to the duration of this written warranty. We do not warrant or represent that the merchandise complies with the provisions of any law or acts unless the manufacturer so warrants. In no event shall Grizzly's liability under this warranty exceed the purchase price paid for the product and any legal actions brought against Grizzly shall be tried in the State of Washington, County of Whatcom.

We shall in no event be liable for death, injuries to persons or property or for incidental, contingent, special, or consequential damages arising from the use of our products.

To take advantage of this warranty, contact us by mail or phone and give us all the details. We will then issue you a “Return Number,” which must be clearly posted on the outside as well as the inside of the carton. We will not accept any item back without this number. Proof of purchase must accompany the merchandise.

The manufacturers reserve the right to change specifications at any time because they constantly strive to achieve better quality equipment. We make every effort to ensure that our products meet high quality and durability standards and we hope you never need to use this warranty.

Please feel free to write or call us if you have any questions about the machine or the manual.

Thank you again for your business and continued support. We hope to serve you again soon.
WARRANTY CARD

The following information is given on a voluntary basis. It will be used for marketing purposes to help us develop better products and services. Of course, all information is strictly confidential.

1. How did you learn about us?
   ____ Advertisement  ____ Friend  ____ Catalog
   ____ Card Deck  ____ Website  ____ Other:

2. Which of the following magazines do you subscribe to?
   ____ Cabinetmaker & FDM  ____ Popular Science  ____ Wooden Boat
   ____ Family Handyman  ____ Popular Woodworking  ____ Woodshop News
   ____ Hand Loader  ____ Precision Shooter  ____ Woodsmith
   ____ Handy  ____ Projects in Metal  ____ Woodwork
   ____ Home Shop Machinist  ____ RC Modeler  ____ Woodworker West
   ____ Journal of Light Cont.  ____ Rifle  ____ Woodworker's Journal
   ____ Live Steam  ____ Shop Notes  ____ Other:
   ____ Model Airplane News  ____ Shotgun News
   ____ Old House Journal  ____ Today's Homeowner
   ____ Popular Mechanics  ____ Wood

3. What is your annual household income?
   ____ $20,000-$29,000  ____ $30,000-$39,000  ____ $40,000-$49,000
   ____ $50,000-$59,000  ____ $60,000-$69,000  ____ $70,000+

4. What is your age group?
   ____ 20-29  ____ 30-39  ____ 40-49
   ____ 50-59  ____ 60-69  ____ 70+

5. How long have you been a woodworker/metalworker?
   ____ 0-2 Years  ____ 2-8 Years  ____ 8-20 Years  ____ 20+ Years

6. How many of your machines or tools are Grizzly?
   ____ 0-2  ____ 3-5  ____ 6-9  ____ 10+

7. Do you think your machine represents a good value?  _____Yes  _____No

8. Would you recommend Grizzly Industrial to a friend?  _____Yes  _____No

9. Would you allow us to use your name as a reference for Grizzly customers in your area?  
   Note: We never use names more than 3 times.  _____Yes  _____No
