Inventory

	Qty: T1002	T1003
A. 48" Shelf Support	8	10
B. 19" Shelf Support	8	10
C. Vertical Rail	4	4
D. Shelf	4	5

Assembly

After unpacking your shelving unit, inventory the parts. You will need a large bench or open floor area to assemble the shelves.

1. Begin by attaching a 48" shelf support to the bottom of two vertical rails as shown in **Figure 2**. This is done by inserting the two T-shaped circular pins, at both ends of all shelf supports, into the keyhole shaped slots on the rails and sliding them down into place.

Figure 2. Attaching long shelf support.

2. Next, attach a 19" shelf support to the adjacent slots on the rail as shown in **Figure 3**.

Figure 3. Attaching short shelf support.

- Now attach a third vertical rail to the opposite side of the 19" shelf support installed in **Step 2**, as shown in **Figure 4**.

Figure 4. Attaching a third rail.

- Repeat **Steps 2** and **3** for the opposite side.
- Attach a fourth 48" shelf support as shown in **Figure 5**.

Figure 5. Attaching fourth shelf support.

- Repeat this process for the remaining shelf supports, placing them at the desired height, making sure that the shelf supports for a given shelf are all at the same height (**Figure 6**).

Figure 6. Repeating steps 1-5.

- Finally, place the shelves from the bottom up as shown in **Figure 7**.
