

MODELS T27429-31 5", 6", 8" PLATE SHEARS INSTRUCTIONS

For questions or help with this product contact Tech Support at (570) 546-9663 or techsupport@grizzly.com

Introduction

These bench-mounted plate shears are designed to cut flat (sheet/plate) stock and round (bar) stock of ferrous and non-ferrous metals, and even plastics. They are simple to use and excel at making quick, clean cuts for rough cutouts. Each model features ground-and-hardened replaceable blades, an extra-long leverage-maximizing handle, and a spring-assisted material hold-down.

Figure 1. Model T27429 plate shear.

Inventory

Description	Qty
Plate Shear Assembly	1
Handle	
Hex Bolts M10-1.5 x 25 Black C8.8	2
Lock Washers 10mm	2
Flat Washers 10mm	2

Shearing Capacities (Mild Steel)

Model	Max. Shearing Length (Throat)	*Max. Thickness up to 2 ³ / ₄ " Wide	*Max. Thickness @ Full Length	*Max. Round Stock Dia.
T27429	41/2"	1/4"	5/32"	3/8"
T27430	4 ⁷ / ₈ "	1/4"	³ / ₁₆ "	3/8"
T27431	7"	1/2"	³ / ₁₆ "	3/8"

* Capacities for high carbon steel and stainless steel are approximately half of those shown here.

Important: DO NOT attempt to shear hardened steel blocks or rod. You will damage or break the shear blades!

Assembly & Mounting

1. Attach handle to plate shear assembly with hex bolts, lock washers, and flat washers, as shown in **Figure 2**.

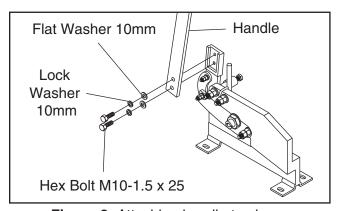

Figure 2. Attaching handle to shear.

Place shear on a workbench. Use mounting holes in base as a guide for drilling and attaching shear. This will prevent it from moving during operation and reduce the risk of accidental injury or damage.

The strongest mounting option is a "Through Mount" (see example below) where holes are drilled all the way through the workbench—and hex bolts, washers, and hex nuts are used to secure the shear in place.

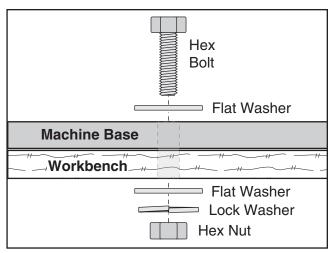

Figure 3. "Through Mount" setup.

Another option is a "Direct Mount" (see example below) where the shear is secured directly to the workbench with lag screws and washers.

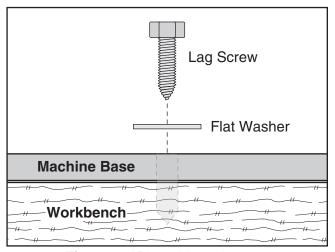

Figure 4. "Direct Mount" setup.

AWARNING

AMPUTATION HAZARD!

To reduce risk of serious personal injury:

- Keep fingers, hands, and all body parts away from blades and cutting area during use.
- Prevent unauthorized use by children or untrained users. Keep children and bystanders at safe distance while shearing.

Basic Operation

1. Raise hold-down using hex bolt shown in **Figure 5** to allow room for workpiece.

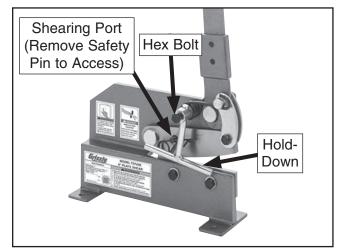

Figure 5. Plate shear hold-down.

- **2.** Place workpiece between blades or through shearing port.
 - If shearing flat workpiece, position and secure hold-down so it firmly presses workpiece against lower blade.
- **3.** Using slow and even pressure, pull handle down to cut workpiece.

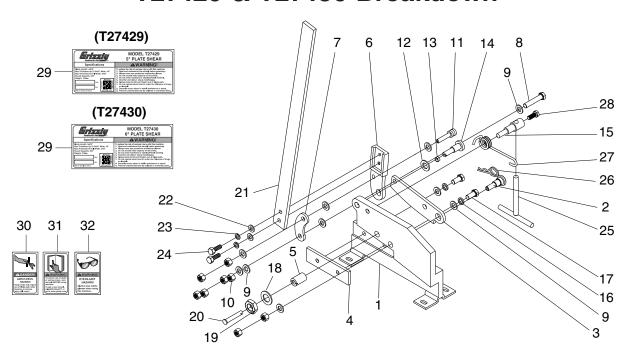

Note: If material seems too thick or too hard, do not force shear! Instead, use metal-cutting bandsaw or other tool to cut workpiece.

Maintenance

- Always keep blades lubricated with light oil.
- Keep pivot points tight.
- Check all shear hardware before every use for loose or worn components.
