February, 2020

Introducing the Grizzly Model T31648 Metal Shrinker/Stretcher Combo Pack

Switch between metal shrinking and stretching operations without changing your tooling!

Commonly used in autobody work, shrinker/stretchers make curves in sheet metal by compressing, or "shrinking," it and expanding, or "stretching," your workpiece. With one dedicated shrinker and one dedicated stretcher, you can mount both tools to your workbench and switch between operations without having to change out your dies. All this for less than the cost of two separate tools!

Workpiece capacity:

- 16-gauge aluminum
- 18-gauge mild steel
- 20-gauge stainless steel

The Model T31648 is available for \$169.95 and is covered by a one-year warranty. For more information call **1-800-523-4777** or visit **www.grizzly.com**.

Due to rapidly changing market conditions our prices may be increased at any time without prior notice. Our website is updated with any changes as they occur.
